The South Central Kansas Metropolitan Medical Response System (SCKMMRS), in collaboration with the Regional Homeland Security Council and regional partners, are proud to present the South Central Kansas Health and Medical Symposium.

Symposium Summary:

The Health and Medical Symposium will provide a chance for South Central Kansas Emergency Support Function 8 (ESF-8) partners to learn from each other how we will all respond to a large incident in the region. This symposium will provide:

- In depth information about each discipline through presentations
- Opportunities to share and understand roles and responsibilities of partner agencies
- Scenario based training that allows participants the chance to learn about resources available within ESF-8
- A Resource Rodeo giving participants the opportunity to see and get more information about equipment and other resources available within ESF-8

The main goal of the symposium is to expand regional collaboration.

Food will be provided to all attendees of the symposium. Hotel accommodations and mileage reimbursement for symposium attendees that are traveling over 50 miles will be available to those that are unable to cover those costs through local grants.

Invitation extended to:

- Emergency Medical Services
- Hospitals
- Fatality Management
- Voluntary Organizations Active in Disaster (VOAD)
- Mental Health
- Animal Response
- Public Health
- Environmental Health
- All others with an ESF-8 role
- Partners who work with ESF-8
