The State of Kansas will be implementing a new Spill and All Hazard telephone notification process, accompanied by a new spill reporting database that will replace the current Form A reporting process. This change will occur on December 1, 2014. It is imperative that all users understand how to make notifications, as well as complete the Form A. The Kansas Division of Emergency Management is offering this training course to all users across the state before the implementation of the program.

The intended audience for this course is anyone who uses Web EOC, would like to learn WebEOC, or anyone that makes spill or all hazard notifications to the state. This includes state, county, federal, and industry partners.

This course is designed to train individuals on the basic use of WebEOC, in depth use of the new WebEOC Spill Database, and use of the new Kansas Spill and All Hazards notification line.

Training will be hands on. *It is recommended that the students bring their own laptops, but computers will be provided as necessary.* A student workbook will also be provided and can be used as a reference guide after the training.

Objectives

- Understand the basic operations of WebEOC
- View, edit, and save changes to an Incident Report
- Successfully navigate the Spill and All Hazards Notification Line
- Educate users within their own agency on the use of the system

Space for training is limited. Early enrollment is encouraged and additional courses will be offered if there is a need. If a training date is not available that meets your needs, please contact **Jamie Schwartz** at (785) 274-1423, or by email at Jamie.L.schwartz4.nfg@mail.mil.
